NOLECOM
rental printing solutions

Create, gather info, print cards.
Remote management, supplies replacement and service maintenance...

WITH NO INVESTMENT, ALL IN A SINGLE FEE

ALL IN SERVICE... ...WITH A COST PER BADGE

EASY DESIGN

Drag and drop the right identity elements, customize the fields and develop unique designs based on pre-built templates.

FLEET MANAGEMENT

Centrally manage card designs, templates, printer configurations and user access to distributed locations.

SAVE TIME

Ease of use, remote configuration, print speed and automatic workflow processes save time and costs.

TAILOR MADE

From high-speed systems that personalize smart cards completely in line to low-cost, low-volume models for basic needs.

TYPE OF CARDS

STANDARD

Blank, white or custom pre-printed. Single side or dual side. Monochrome or color.

Examples:

- Loyalty card
- ID card - visual identity
- Food/beverage security

MAGNETIC STRIPE

Magnetic stripe encoding 1D/2D bar codes for quick scanning.

Examples:

- ID card - controlled access
- Guest card
- Event or seasonal pass

CHIP

Contact and contactless smart cards personalized. Customer-specific smart chip encoding.

Example:

- ID card - security access
- Membership and loyalty card or gift card
- Smart card

HIGH SECURITY

Protection against fraud and counterfeiting with holographic images, guilloche patterns, microprinting and more.

Example

- ID government card
- ID card - high security access
- Banking and financial card

SIMPLE STEPS FROM START TO FINISH

CREATE YOUR CARD

Begin card design choosing your badge model and type based on pre-built templates.

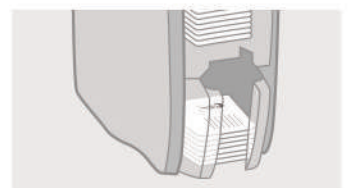

GATHER CRITICAL INFO

Build your database with cardholder information or merge existing databases and connect capture devices.

PREPARE YOUR PRINTER

Load ribbons, cleaning rollers, and cards into your printer, allowing it to recognize and adjust accordingly.

PRINT CARDS

Minutes after set-up, you'll be encoding, printing cards.
